

SpeechFinder Install Guide

23. Juli 2013

1 System Requirements

The application SpeechFinder is designed to run on Microsoft Windows XP or later. It requires the following packages to be installed:

- Microsoft .NET Framework Version 4.0 Redistributable Package
- Microsoft DirectX End-User Runtime
- Microsoft Visual C++ 2010 Redistributable Package (x86)

These three packages can be downloaded for free from <http://www.microsoft.com/downloads>.

IMPORTANT: The packages must be installed in the order listed above in order to work correctly.

2 Installation

To install the SpeechFinder application please copy SICore.dll, SpeechFinder.exe and SpeechFinder.exe.config in a separate directory and start SpeechFinder from there. Additionally, you may create a shortcut of SpeechFinder.exe on your desktop.
